

Lipoprotein(a) Word Search Challenge

Did you know high Lp(a) levels affect about 1 in 5 people worldwide? Lipoprotein(a), or Lp(a), is a cholesterol-carrying lipoprotein in your blood. **Your level is mostly inherited, and when it is high, it can increase your risk of heart disease and stroke.** The only way to know your level is to get tested. Current guidelines recommend **every adult be tested at least once in their lifetime.** Ask your health care professional for an Lp(a) test today.

Welcome to the Lp(a) Word Search Challenge! Find and circle the hidden words related to Lipoprotein(a). **Words can be vertical, horizontal or diagonal.**
