

2025 Guidelines Updates—CPR in Schools® With First Aid

The 2025 American Heart Association Guidelines for Cardiopulmonary Resuscitation (CPR) and Emergency Cardiovascular Care (ECC) introduced notable updates that are listed here for your awareness. The educational content in our community courses continues to be valid and appropriate to help save the life of someone experiencing cardiac arrest.

Adults and Children

- When giving breaths to an adult in cardiac arrest, provide only enough breath to make the chest rise.
- For an adult or a child who is severely choking, alternate between giving 5 back blows and 5 abdominal thrusts until the object is forced out or the person becomes unresponsive.
